

Health and Wellness Action

Dear Patients,

As we monitor patients and protocol, provided by the CDC regarding COVID 19, we remain diligent in following standard operating procedures and have heightened protocol including more frequent cleaning and disinfecting, while educating staff on preventative measures provided by public health officials.

We are continuing to operate during regular business hours.

We ask that you do your part to help maintain a healthy environment by washing your hands upon entry to the office; keeping your hands off your face; and to reschedule your appointment if you are exhibiting fever or cough symptoms.

A clean, healthy, safe environment for our staff is priority to us. Getting adjusted and keeping your immune systems strong will benefit you, and in turn our community.

Dr. Bova will be moving as fast as possible to reduce your wait times and limit your exposure to others. Waiting in your car is an option, just call us when you arrive, and we will call you when a room is ready. 716-675-4134.
